

Question

July 19 - 40

Roosevelt, Utah

Mr. T. H. Humphrey in  
regard to the Swater  
commence for Montez. Cr.  
it is not turning out  
very satisfactory you  
say the 3 of June he was  
appointed and I went  
up the creek on the 28 of  
June just two days  
before I got your letter  
telling me he had been  
appointed and found  
a man with a dam  
across the creek with  
all the <sup>water</sup> say a boat one  
second foot and that  
lessened the flow and  
the hot weather caused

## the Evaporation So

the rest of the stream  
dried up and has not  
reached us for 30 or  
40 days. and it is all  
due to the Dry Gulch Co  
not making a ditch or  
not keeping it in repair  
that we can't get our  
water to reach down.  
and if you can help  
me out by making  
them clean out the  
sand and gravel bars.  
So the Evaporation will  
be less. I met with  
the board of Directors a  
year ago and I Expla-  
ined to them where

the transportation to

the ditch was 45-ft  
 wide and the center fill-  
 ed with gravel till it  
 was higher than either  
 bank and several places  
 like that and when  
 they have no water to  
 turn ~~in~~ ~~the~~ ~~ditch~~  
 1 or 2 second ft. of  
 water to run over the  
 hot rocks for a mile  
 or 2. and spread so wide  
 and they promised to  
 clean it out and never  
 done a tap i wish i  
 was able to sue them  
 for damages since  
 they came in so if  
 you will write them  
 over

I think it will  
bring them to him  
as it did once before  
when you wrote to  
them about a head-  
gate for me so thanks  
in advance with  
kindest regards

**Samuel Snyder**

P.S. Note in my letter  
up here I said he  
turned out all the  
water it was 3 or 4 mil-  
es up and Spring-  
gs up.
